Crowborough Business Matters

Third Edition

Summer 2003

Newsletter issued to all known businesses in Crowborough by

The Business Group
part of **The Crowborough Partnership**.

This 3rd Business Newsletter brings together work and discussions over the past 12 months to help 'kick start' the local economy of Crowborough and at long last, spells out where we go from here. Thursday 25th September could be a very important date for businesses.

Just about every business has been contacted with a Business Opinion Survey and received 2 Newsletters, the second of which outlined key findings and what the next steps would be.

Those steps have now been completed and over 50 local companies from all business sectors have influenced the next stage which resulted in the enclosed invitations going out to all businesses to attend a meeting on the 25th September at 6pm with the aim of trying to increase local networking opportunities, to put together a programme of events that businesses say they want and will support as well as to enhance the level and accessibility of business support.

In addition, the 10 original business support agencies / authorities have identified specific areas of activity where they can offer advice and support. A 'quick reference' card is enclosed.
